The author

Renato Mite is determined to make of writing his craft. He writes since he was ten years old, starting off with a green typewriter Olivetti Lettera 32 and eccentric stories, in the following years he refines the art with short stories up to his first novel, "Apoptosis", a sci-fi thriller sprang from the passion for science, technology and informatics.

Visit the site www.renatomite.it for more information and other press kits.
